

ANDREW MCCELLAN

Guided by a passion for leadership, my adult career has been spent leading diverse teams with a variety of missions. As a manager, I found that one of the greatest obstacles in helping my teams improve was a lack of quality, easy-to-use applications. Fueled by the desire to fill this gap, and an even greater affection for programming and design, I'm excited to transition into a career that will allow me to make the most of my work experience while focusing on my true passion: creating beautiful and useful things.

KEY ACHIEVEMENTS

- Successfully completed Dev Bootcamp's 19-week immersive web development program, which included over 1000 hours of coding projects focused on full-stack application development.
- Elected as team-lead by my Dev Bootcamp peers in the development of an original anti-bullying app (Shield_ED), which gives students an anonymous channel to report violence within their school - (github.com/gopher-snakes-2014/shieldED).
- Opened and operated two of Coach's initial factory outlet locations in the Phonex, AZ market.
- Played a key role in planning, organizing, and developing a start-up distribution center for The Home Depot, which eventually earned the "2011 - Center of Excellence" award for the region.
